Methodology

1,219 Alberta residents were surveyed between May 12 - May 14, 2023.

We used the Lucid Exchange Platform as the sample provider, which blends a variety of partner panels.

If the survey was a probability-based random sample of the same size, it would be considered accurate to +/- 3% nineteen times out of twenty. Results are weighted for:

Age, gender and region according to the most recent Census.

Methodolog

1,219 Alberta residents were surveyed between May 12 – May 14, 2023.

We used the Lucid Exchange Platform as the sample provider, which blends a variety of partner panels.

We used the Lucid Exchange Platform as the sample provider, which blends a variety of partner panels.

If the survey was a probability-based random sample of the same size, it would be considered accurate to +/- 3% nineteen times out of twenty. Results are weighted for:

Age, gender and region according to the most recent Census.

Methodology

1,219 Alberta residents were surveyed between May 12 – May 14, 2023.

We used the Lucid Exchange Platform as the sample provider, which blends a variety of partner panels.

If the survey was a probability-based random sample of the same size, it would be considered accurate to +/- 3% nineteen times out of twenty. Results are weighted for:

Age, gender and region according to the most recent Census.
