Methodology
 1,232 Alberta residents were surveyed between May 25 - May 26, 2023.
 We used the Lucid Exchange Platform as the sample provider, which blends a variety of partner panels.
 If the survey was a probability-based random sample of the same size, it would be considered accurate to +/- 3% nineteen times out of twenty. Results are weighted for: Age, gender, region, and education according to the most recent Census. The survey was self-commissioned and paid for by Counsel Public Affairs.

Methodology
 1,332 Alberta residents were surveyed between May 25 – May 26, 2023.
 We used the Lucid Exchange Platform as the sample provider, which blends a variety of partner panels.
 If the survey was a probability-based random sample of the same size, it would be considered accurate to +/- 3% nineteen times out of twenty. Results are weighted for:
 Age, gender, region, and education according to the most recent Census. The survey was self-commissioned and paid for by Counsel Public Affairs.
